Opinions are divergent in ~~that whether that~~ we should share information as possible as we can in all fields. Some ~~believe~~ believe that sharing that kind of knowledge online will lead to a global ~~development~~ development, whereas others claim that some information is not suitable for sharing for free. ←

One common reason for ~~people to~~ people sharing resources is that they would like to make others convenient. Due to the Internet, if we update the knowledge on our blogs, everyone can find it immediately. Also, for the second reason, they may ~~believe~~ believe that information in science ~~researches,~~ research, Business, and so on is contributed to improve society around the world. That is, people can easily ~~seek-~~ outfind the knowledge they want, and they ~~can make~~ can use of it to modify their prototype. ←

Despite the advantages above, in my view, some valuable information should not be posted on the Internet. ~~Firstly,~~ First, it will cause excessive use of information. The ~~easier~~ easier the public can ~~get it,~~ get, the lower the level of information is, even though the content is treasure. ~~Secondly, over copy~~ Second, overcopying is a considerable problem, which ~~violate~~ violates the intellectual property ~~of of the~~ authors. Sometimes, people steal concepts or principles from public articles. This is accused of a kind of crime. ←
